American Journal of Physiology: Renal, Fluid and Electrolyte Physiology

No. 1. JANUARY 1992

Ammonium and bicarbonate transport in rat outer medullary collecting ducts
M. F. Flessner, S. M. Wall, and M. A. Knepper F1

Age-related changes in renal cytochrome *P*-450 arachidonic acid metabolism in spontaneously hypertensive rats
K. Omata, N. G. Abraham, B. Escalante, and M. L. Schwartzman F8

Release of angiotensins in paraventricular nucleus of rat in response to physiological and chemical stimuli
J. W. Harding, L. L. Jensen, J. M. Hanesworth, K. A. Roberts, T. A. Page, and J. W. Wright F17

Control of kidney size by sex hormones: possible involvement of glucosylceramide
A. Shukla, G. S. Shukla, and N. S. Radin F24

Effect of insulin on potassium secretion in rabbit cortical collecting ducts
H. Furuya, K. Tabei, S. Muto, and Y. Asano F30

Effects of barium and 5-(*N*-ethyl-*N*-isopropyl)-amiloride on proximal tubule ammonia transport
E. E. Simon, C. Merli, J. Herndon, E. J. Cragoe, Jr., and L. L. Hamm F36

Suppression of blood flow autoregulation plateau during nitric oxide blockade in canine kidney
D. S. A. Majid and L. G. Navar F40

Luminal flow rate regulates proximal tubule H-HCO_3 transporters
P. A. Preisig F47

Assembly of distinctive coated pit and microvillar microdomains in the renal brush border
D. Biemesderfer, G. Dekan, P. S. Aronson, and M. G. Farquhar F55

Prostaglandin interactions with angiotensin, norepinephrine, and thromboxane in rat renal vasculature
C. Chatziantoniou and W. J. Arendshorst F68

Regulation of glycolytic metabolism during long-term primary culture of renal proximal tubule cells
M. D. Aleo and R. G. Schnellmann F77

Analysis of K^+ transport by rabbit CCD: conductive pathways and K^+-K^+ exchange by Na^+-K^+ pump
T. Nonaka, D. H. Warden, and J. B. Stokes F86

Periventricular lesions block natriuresis to hypertonic but not isotonic NaCl loads
M. J. McKinley, B. Lichardus, J. G. McDougall, and R. S. Weisinger F98

Secretory renal proximal tubules in seawater- and freshwater-adapted killifish
W. H. Cliff and K. W. Beyenbach F108

Taurine attenuates renal disease in chronic puromycin aminonucleoside nephropathy
H. Trachtman, R. Del Pizzo, S. Futterweit, D. Levine, P. S. Rao, E. Valderrama, and J. A. Sturman F117

Renal vascular reactivity to vasodilator prostaglandins in genetically hypertensive rats
C. Chatziantoniou and W. J. Arendshorst F124

Production and polarized secretion of basement membrane components by glomerular epithelial cells
Y. Natori, Y. M. O'Meara, E. C. Manning, A. W. M. Minto, J. S. Levine, W. J. Weise, and D. J. Salant F131

Maturation of cGMP response to ANP by isolated glomeruli
L. L. Norling, C. A. Vaughan, and R. L. Chevalier F138

RAPID COMMUNICATIONS

Role of cytoskeleton in volume regulation of rabbit proximal tubule in dilute medium
M. A. Linshaw, C. A. Fogel, G. P. Downey, E. W. Y. Koo, and A. I. Gotlieb F144

Isolation of putative voltage-gated epithelial K-channel isoforms from rabbit kidney and LLC-PK_1 cells
G. V. Desir, H. A. Hamlin, E. Puente, R. F. Reilly, F. Hildebrandt, and P. Igarashi F151

ANNOUNCEMENTS F158

No. 2. FEBRUARY 1992

WALTER B. CANNON LECTURE

Introduction F159

Effect of pharmacological manipulation of endogenous atriopeptin activity on renal function
M. R. Wilkins and P. Needleman F161

Glucose and amino acid metabolism in chronic renal failure: effect of insulin and amino acids
P. Castellino, A. Solini, L. Luzi, J. G. Barr, D. J. Smith, A. Petrides, M. Giordano, C. Carroll, and R. A. DeFronzo F168

Cell polarity and calcium oxalate crystal adherence to cultured collecting duct cells
R. J. Riese, N. S. Mandel, J. H. Wiessner, G. S. Mandel, C. G. Becker, and J. G. Kleinman F177

Vasopressin and phorbol ester-stimulated phosphatidylcholine metabolism in mesangial cells
D. A. Troyer, O. F. Gonzalez, R. M. Padilla, and J. I. Kreisberg F185

Mechanism of decreased calcitriol degradation in renal failure
C. H. Hsu, S. R. Patel, and E. W. Young F192

Postnatal maturation of rabbit renal collecting duct. III. Peanut lectin-binding intercalated cells
L. M. Satlin, T. Matsumoto, and G. J. Schwartz F199

Parathyroid hormone inhibits proximal tubule Na^+-K^+-ATPase activity
C. P. Ribeiro and L. J. Mandel F209

Localization of ecto-ATPase in rat kidney and isolated renal cortical membrane vesicles
I. Sabolić, O. Čulić, S.-H. Lin, and D. Brown F217

PGE_2 inhibits water permeability at a post-cAMP site in rat terminal inner medullary collecting duct
S. P. Nadler, J. A. Zimpelmann, and R. L. Hébert F229

Distribution of angiotensin II receptor subtypes in rat and human kidney
L. A. Sechi, E. F. Grady, C. A. Griffin, J. E. Kalinyak, and M. Schambelan F236

Vasopressin regulates apical and basolateral Na^+-H^+ antiporters in mouse medullary thick ascending limbs
A. M. Sun, D. Kikeri, and S. C. Hebert F241

Cholinergic effects on intracellular free calcium concentration in renal corpuscle: role of parietal sheet
F. Lebrun, F. Morel, G. Vassent, and J. Marchetti F248

Cholinergic stimulation of phosphoinositide metabolism in isolated rat glomeruli
P. Meneton, M. Bloch-Faure, G. Guillon, D. Chabardès, F. Morel, and R. M. Rajerison F256

Selected polyclonal antibodies and ADH challenge in frog urinary bladder: a label-fracture study
G. Calamita, G. Valenti, M. Svelto, and J. Bourguet F267

Bidirectional peritoneal transport of immunoglobulin in rats: compartmental kinetics
M. F. Flessner, R. L. Dedrick, and J. C. Reynolds F275

Immunocytochemical response of type A and type B intercalated cells to increased sodium chloride delivery
J. Kim, W. J. Welch, J. K. Cannon, C. C. Tisher, and K. M. Madsen F288

Interaction of atrial natriuretic factor and angiotensin II in proximal HCO_3^- reabsorption
G. N. Gomes and M. Mello Aires F303

Response of intercalated cells to chloride depletion metabolic alkalosis
J. W. Verlander, K. M. Madsen, J. H. Galla, R. G. Luke, and C. C. Tisher F309

SPECIAL COMMUNICATION

A servo-control system for open- and closed-loop blood pressure regulation
B. Nafz, P. B. Persson, H. Ehmke, and H. R. Kirchheim F320

RAPID COMMUNICATION

Autoradiographic characterization of angiotensin receptor subtypes in fetal and adult human kidney
H.-J. Gröne, M. Simon, and E. Fuchs F326

ANNOUNCEMENTS F332

No. 3. MARCH 1992

Plasma IgG pool is not defended from urinary loss in nephrotic syndrome
H. A. Al-Bander, V. I. Martin, and G. A. Kaysen F333

Effect of peritubular hypertonicity on water and urea transport of inner medullary collecting duct
L. H. Kudo, K. R. César, W. C. Ping, and A. S. Rocha F338

Selective preglomerular constriction to nerve stimulation in rat hydronephrotic kidneys
J. T. Fleming, C. Zhang, J. Chen, and J. P. Porter F348

Anoxia induces phospholipase A_2 activation in rabbit renal proximal tubules
D. Portilla, L. J. Mandel, D. Bar-Sagi, and D. S. Millington F354

Effect of mesangiolysis on autoregulation of renal blood flow and glomerular filtration rate in rats
B. M. Iversen, F. I. Kvam, K. Matre, L. Mørkrid, G. Horvei, W. Bagchus, J. Grond, and J. Ofstad F361

Morphometric analysis of the actions of angiotensin II on renal arterioles and glomeruli
K. M. Denton, P. A. Fennessy, D. Alcorn, and W. P. Anderson F367

Ion transport by primary cultures of Mongolian gerbil middle ear epithelium
P. Herman, G. Friedlander, P. Tran Ba Huy, and C. Amiel F373

Selective decrement of anionic immunoglobulin clearance after induced renal hemodynamic changes in diabetic patients
U. Di Mario, S. Bacci, S. Morano, G. Pugliese, P. Pietravalle, D. Andreani, S. Morabito, B. Simonetti, and A. Pierucci F381

Gene expression of growth-related proteins and ECM constituents in response to unilateral nephrectomy
T. Nakamura, I. Ebihara, Y. Tomino, H. Koide, K. Kikuchi, and K. Koiso F389

Calmodulin antagonists stimulate renin secretion and inhibit renin synthesis in vitro
R. Della Bruna, F. Pinet, P. Corvol, and A. Kurtz F397

Involvement of chloride in renin secretion from isolated rat glomeruli
O. Skøtt and B. L. Jensen F403

Regulation of plasma membrane-bound Ca^{2+}-ATPase pump by inositol phosphates in rat brain
C. L. Fraser and P. Sarnacki F411

Localization of cGMP after infusion of ANP or nitroprusside in the maturing rat
R. L. Chevalier, R. J. Fern, M. Garmey, S. S. El-Dahr, R. A. Gomez, and J. de Vente F417

Greater unidirectional calcium efflux from bone during metabolic, compared with respiratory, acidosis
D. A. Bushinsky, N. E. Sessler, and N. S. Krieger F425

Characterization of angiotensin II receptor subtypes in human glomeruli and mesangial cells
D. Chansel, S. Czekalski, P. Pham, and R. Ardaillou F432

Acidosis inhibits osteoblastic and stimulates osteoclastic activity in vitro
N. S. Krieger, N. E. Sessler, and D. A. Bushinsky F442

Vanadate causes hypokalemic distal renal tubular acidosis
E. Dafnis, M. Spohn, B. Lonis, N. A. Kurtzman, and S. Sabatini F449

AVP stimulates Na^+ transport in primary cultures of rabbit cortical collecting duct cells
C. M. Canessa and J. A. Schafer F454

Regulation of intracellular potassium in mesangial cells: a fluorescence analysis using the dye, PBFI
S. E. Kasner and M. B. Ganz F462

Hypotonicity and cell volume regulation in shark rectal gland: role of organic osmolytes and F-actin
F. N. Ziyadeh, J. W. Mills, and A. Kleinzeller F468

Basolateral 3-*O*-methylglucose transport by cultured kidney (LLC-PK_1) epithelial cells
J. M. Mullin, L. M. Kofeldt, L. M. Russo, M. M. Hagee, and A. H. Dantzig F480

Active potassium absorption by the renal distal tubule
M. D. Okusa, R. J. Unwin, H. Velázquez, G. Giebisch, and F. S. Wright F488

Dopamine receptor-mediated activation of phospholipase C is associated with natriuresis during high salt intake
S. J. Vyas, A. L. Jadhav, J. Eichberg, and M. F. Lokhandwala F494

Participation of protein kinase C in desensitization to bradykinin and to carbachol in MDCK cells
H. Luo, R. P. Lindeman, and H. S. Chase, Jr. F499

Effect of altered acid-base balance and of various agonists on levels of renal glutamate dehydrogenase mRNA
S. Kaiser, J.-J. Hwang, H. Smith, C. Banner, T. C. Welbourne, and N. P. Curthoys F507

RAPID COMMUNICATIONS

Roles of cephalic Na^+ concentration and urodilatin in control of renal Na^+ excretion
C. Emmeluth, C. Drummer, R. Gerzer, and P. Bie F513

Transport properties of an in situ jejunal reservoir in dogs
E. D. Kwon, H. P. Schedl, J. F. Donovan, R. A. Carson, and R. D. Williams F517

No. 4. APRIL 1992

EDITORIAL REVIEW

Growth factors and metanephrogenesis
M. R. Hammerman, S. A. Rogers, and G. Ryan F523

Metanephric transforming growth factor-α is required for renal organogenesis in vitro
S. A. Rogers, G. Ryan, and M. R. Hammerman F533

Triiodothyronine enhances renal tubule cell replication by stimulating EGF receptor gene expression
H. D. Humes, D. A. Cieslinski, L. B. Johnson, and I. O. Sanchez F540

Pharmacological characterization of V_{1a} vasopressin receptors in the rat cortical collecting duct
A. Ammar, S. Roseau, and D. Butlen F546

Arachidonic acid inhibits the secretory K^+ channel of cortical collecting duct of rat kidney
W. Wang, A. Cassola, and G. Giebisch F554

Regulation of the renal Na-HCO_3 cotransporter by cAMP and Ca-dependent protein kinases
O. S. Ruiz and J. A. L. Arruda F560

Proximal tubular dopamine production regulates basolateral Na-K-ATPase
A. D. Baines, P. Ho, and R. Drangova F566

Involvement of C_3 exotoxin-sensitive G proteins (*rho/rac*) in PTH signal transduction in OK cells
S. J. Reshkin and H. Murer F572

Conductive properties of a rabbit cortical collecting duct cell line: regulation by isoproterenol
P. Dietl, N. Kizer, and B. A. Stanton F578

Effect of metabolic acidosis and alkalosis on NEM-sensitive ATPase in rat nephron segments
C. Khadouri, S. Marsy, C. Barlet-Bas, L. Cheval, and A. Doucet F583

Renal cytochrome *P*-450-arachidonic acid metabolism: localization and hormonal regulation in SHR
K. Omata, N. G. Abraham, and M. L. Schwartzman F591

Age-associated changes in ammoniagenesis in isolated rat renal tubule segments
H. Yamada, B. Sacktor, and J. Kinsella F600

Apical membrane potassium channels in frog diluting segment: stimulation by furosemide
A. M. Hurst and M. Hunter F606

Renal and systemic effects of urodilatin in rats with high-output heart failure
Z. A. Abassi, J. R. Powell, E. Golomb, and H. R. Keiser F615

Calcium oxalate monohydrate crystals are endocytosed by renal epithelial cells and induce proliferation
J. C. Lieske, M. M. Walsh-Reitz, and F. G. Toback F622

Effect of dietary protein on renin and angiotensinogen gene expression after renal ablation
R. Correa-Rotter, T. H. Hostetter, and M. E. Rosenberg F631

Eicosanoids enhance epidermal growth factor receptor activation and proliferation in glomerular epithelial cells
A. V. Cybulsky, P. R. Goodyer, M.-D. Cyr, and A. J. McTavish F639

Injury-induced changes in cytosolic Ca^{2+} in individual rabbit proximal tubule cells
M. W. Smith, P. C. Phelps, and B. F. Trump F647

Morphometric analysis of kidney hypertrophy in rats after chronic potassium depletion
M. Elger, L. Bankir, and W. Kriz F656

Multiple signaling pathways for Cl^--dependent depolarization of mesangial cells: role of Ca^{2+}, PKC, and G proteins
S. G. Kremer, W. Zeng, S. Sridhara, and K. L. Skorecki F668

SPECIAL COMMUNICATION

Attenuated expression of epithelial cell adhesion molecules in murine polycystic kidney disease
M. V. Rocco, E. G. Neilson, J. R. Hoyer, and F. N. Ziyadeh F679

RAPID COMMUNICATIONS

Phenol red inhibits growth of renal epithelial cells
M. M. Walsh-Reitz and F. G. Toback F687

H^+-K^+-ATPase activity in rat collecting duct segments
J. D. Gifford, L. Rome, and J. H. Galla F692

No. 5. MAY 1992

EDITORIAL REVIEW

Integrin receptors in the glomerulus: potential role in glomerular injury
S. Adler F697

Spatial and temporal expression of kallikrein and its mRNA during nephron maturation
S. S. El-Dahr and J. Chao F705

Chronic DOC treatment enhances Na^+-H^+ exchanger activity of β-intercalated cells in rabbit CCD
